

SERVICE BULLETIN

SUBJECT: New 3DS Copeland Compressor

BULLETIN NO: C 052

DATE: May 22, 2002

In January of 2001 Thermo King introduced a new Delta Wing designed suction reed compressor in the CRR units. This bulletin will outline the different part numbers between the old and new compressors and the interchangeability between them.

- 8102-743 Delta Wing Compressor NEW
Copeland Model # D3DSTA
Valve Plate kit # 22-1132 Can only be used on a Delta Wing compressor not interchangeable with Laser Reed
Valve Plate Gasket only # 33-3513
- 8102-646 Laser Reed Compressor OLD
Copeland Model # D3DST
Valve Plate kit # 22-1051 Can only be used on the this compressor not interchangeable with the Delta Wing
Valve Plate Gasket only # 503-277
- 8102-716 Moduload Compressor (Delta Wing) NEW
Valve Plate Kit # 22-1162
Valve Plate Gasket only # 33-3513
- 502-174 Moduload Compressor (Laser Reed) OLD
Valve Plate Kit # 503-308
Valave Plate Gasket only # 503-284

Some of the compressors, have a recess in the suction end bell housing, if there is a interference fit between the housing and suction service valve, spacer kit 02-7043 needs to be ordered.

- 33-3175 Discharge gasket, metal with a rubber coating
